Tell me, I forget. Teach me, I remember. Involve me, I understand.

Love2study "Study Methods Course"

- Approx 1.5 – 2.0 hour course duration (including breaks)
- 1-2-1 environment with student
- Follow up refresher session 1 hour duration within 3 months

In our Study Methods Course, we first assess the type of learner (auditory/visual/tactile) and conduct a brief study skills assessment.

We then teach the student how to study effectively and remember the information by teaching and then letting them practice:

- * How to break down information to more manageable pieces;
- * How to use drawings or diagrams as part of study;
- * Simple memory skills;
- * How to create effective & correct study notes;
- * Organization of study notes and other important study material;
- * How to translate text and study information into own words;
- * Keywords and important information recognition and highlighting;
- * How to achieve understanding;
- * The importance of class work and homework;
- * How to study independently and responsibly.

The methods course is not over until the student has successfully applied the methods taught to their own (unstudied) material without any supervision from us! A lesson feedback report is emailed to the parent or student the next working day.

This course includes a free follow-up or method refresher session during the 3 month guarantee period.
